HARSHAL GALANDE

DevOps Engineer

+91-8180903425 | harshalgalande9@gmail.com | linkedin.com/in/harshalgalande | github.com/Harshalx07 | Portfolio | Pune, India

PROFESSIONAL SUMMARY

DevOps Engineer with **6 months of production internship experience** and **4 end-to-end infrastructure projects** covering CI/CD automation, Kubernetes orchestration, and Infrastructure as Code on AWS and GCP. Compressed release cycles from **2 hours to 15 minutes** using Jenkins and GitHub Actions. Provisioned cloud-native environments from zero to live in **under 10 minutes** with Terraform. Reduced MTTD from hours to **under 5 minutes** via Prometheus and Grafana. AWS Cloud Practitioner certified.

TECHNICAL SKILLS

CI/CD and GitOps: Jenkins, GitHub Actions, ArgoCD, GitOps, Jenkinsfile, Git, GitHub, YAML
Containers and Kubernetes: Docker, Kubernetes, Amazon EKS, GKE, Helm, Horizontal Pod Autoscaler (HPA)
Infrastructure as Code: Terraform, Ansible, EC2, S3, VPC, IAM, ELB, RDS, Auto Scaling
Cloud Platforms: AWS (primary), GCP, Azure, CloudWatch
DevSecOps and Monitoring: Prometheus, Grafana, Trivy, OPA, Aqua Security, custom alerting
Scripting and OS: Python, Bash/Shell, Linux Administration, NGINX, TCP/IP, DNS, version control

PROFESSIONAL EXPERIENCE

DevOps Engineer Intern | CloudDevOpsHub, Indore, India (Remote) | **Oct 2025 – Mar 2026**

- Built CI/CD pipelines from scratch using Jenkins and GitHub Actions, compressing a **2-hour manual release → fully automated 15-minute pipeline** with zero human intervention on release day.
- Containerized **5 microservices** with Docker and deployed on self-built multi-node Kubernetes clusters, eliminating environment inconsistencies across dev, staging, and production — **configuration drift reduced to zero**.
- Engineered reusable Terraform modules (EC2, S3, VPC, IAM) replacing all manual AWS console workflows — new environments provisioned from **zero to live in under 10 minutes**.
- Deployed Prometheus and Grafana observability stack with custom alerting rules, cutting MTTD from hours to **under 5 minutes**; automated Linux admin tasks via Python and Bash saving **3 hours/week**.

PROJECTS

Tetris v2 – CI/CD and GitOps Deployment | *Jenkins, Docker, Kubernetes, ArgoCD, GitOps*

- Engineered a Jenkins pipeline to build, tag, and push Docker images to Docker Hub and auto-update Kubernetes manifests via GitOps — **complete deploy cycle under 3 minutes**; diagnosed and resolved image-tag mismatch bug, restoring pipeline to production-ready state within the same sprint.

CI/CD Pipeline – Java Spring Boot Application | *Jenkins, Docker Multi-Stage, GitHub, Kubernetes*

- Designed multi-stage Docker build pipeline triggered on GitHub push via webhook — **build reliability improved by 50%** and **Docker image size reduced by 60%**, accelerating Kubernetes pull times across all nodes.

E-Commerce Microservices on Google Kubernetes Engine | *GKE, Java, Python, Go, .NET, Helm, HPA*

- Deployed **6 independent microservices** on GKE with Horizontal Pod Autoscaler and rolling updates — **platform uptime improved by 70%** through isolated, auto-scaling services managed via Helm.

AWS Cloud Infrastructure – Terraform IaC | *Terraform, EC2, VPC, RDS, ELB, IAM, Auto Scaling, S3*

- Provisioned **40+ AWS resources** across dev, staging, and production using reusable Terraform modules — **deployment velocity up 65%** with zero manual console clicks; architected VPC with public/private subnets, NAT Gateway, ELB, and Auto Scaling for high availability.

CERTIFICATIONS

AWS Cloud Practitioner – Amazon Web Services, 2025
AWS Solutions Architect – Virtual Job Simulation – Forage, 2025
Claude Code in Action – Anthropic, 2025
Multi-Cloud + DevOps with AI – CloudDevOpsHub, 2026

EDUCATION

Bachelor of Commerce (In Progress) | YCMOU, Nashik | **2025 – 2028**
Coursework: Python, Linux, Networking, DBMS, Git, Automation
